4.7★

The Thule 711300 Roof Racks are a premium set of silver crossbars at £124.99, with a strong 4.7★ rating. They're a good benchmark for fit, build quality, and brand confidence, but you can save money or get a different feature set with the options below.

Amazon Basics Cross Rail Roof Rack, 142 cm — £52.49, 4.6★ This is the best value alternative if your car has raised side rails with a gap and you want a straightforward, low-cost crossbar solution. Compared with the Thule, it's much cheaper and still well rated, but it won't feel as refined in finish, adjustment precision, or long-term brand support. Choose this if you want a practical roof rack for occasional bikes, boxes, or camping gear without paying premium money.

Thule 710600 Roof Racks — £120.99, 4.6★ This is the closest alternative if you want to stay with Thule but are comparing prices or specifications. It's slightly cheaper than the 711300 and carries the same trusted brand name, which is useful if you care about fit confidence and resale value. The downside is that it's not a big saving, so it makes most sense if this model fits your vehicle better or is easier to source.

Amazon Basics Cross Rail Roof Rack, 132 cm — £45.14, 4.6★ If your car is smaller or has a narrower rail span, this shorter Amazon Basics set is the cheapest option here and still has a strong rating. It's ideal for drivers who only need basic carrying capacity for a roof box or light loads. Compared with the Thule, you give up premium materials and brand reassurance, but for many UK drivers doing the odd weekend trip, it's hard to ignore the price.

Sailnovo Car Roof Bag 20 Cubic Feet — £66.49, 4.5★ This is not a direct roof rack replacement, but it's a useful alternative if your main goal is extra luggage space rather than permanent bars. It's better than the Thule for drivers who don't want to leave hardware on the roof all year, and it can suit cars with or without roof bars. The trade-off is that a soft roof bag is less secure, less aerodynamic,

and not as neat for regular use. It's best for holiday trips, occasional airport runs, and drivers who need space fast.

VEVOR Roof Rack Cross Bars — £42.99, 4.4★ This is another budget-friendly crossbar option for vehicles with raised side rails and a gap. It's cheaper than the Thule by a wide margin and includes locks, which is handy for peace of mind in UK car parks and on overnight trips. However, the lower rating and less established brand mean it's more of a budget gamble. Pick this if price is the main factor and you're comfortable checking fit and load limits carefully.

Overall, the Amazon Basics and VEVOR options are the best value picks, while the Thule 710600 is the closest like-for-like alternative. If you want the safest bet for frequent use, motorway trips, or carrying a roof box through British weather, the original Thule still has the edge in confidence and finish.

Still Buy the Original If...

Choose the Thule 711300 if you want the most trusted option for regular use, better long-term durability, and a premium fit. It's also the safer pick if you'll be carrying heavier loads or want a rack that feels more reassuring on UK motorways and in poor weather.
